

Celebrating Florida's Solar Energy Future

Ten years ago, we built the FPL DeSoto Next Generation Solar Energy Center, which was the largest photovoltaic solar power plant in the nation at the time. Today, we operate 18 solar power plants across Florida, generating clean energy for all of our customers. What a difference a decade makes!

Through one of the largest solar expansions in the U.S., we continue to add even more solar at a rapid pace while keeping bills among the lowest in the nation. Right now, we're hard at work on 10 new solar power plants that are just months away from completion.

In addition, we recently announced plans to create the largest community solar program in the nation. If approved by the Florida Public Service Commission, FPL SolarTogetherSM would allow you to be a part of the Sunshine State's clean energy future.

Be among the first to get program updates. Visit: [» FPL.com/solartogether](https://www.fpl.com/solartogether)

A herd of sheep at the FPL Blue Cypress Solar Energy Center maintain the grounds, helping keep the grass low.

Winter is coming: TOU hours changing

Time-of-use rate hours change in November. Save on your bill by changing timers and operation of equipment to off-peak winter hours: Monday through Friday, 10 a.m. to 6 p.m. and 10 p.m. to 6 a.m.

Maximize savings: [» FPL.com/TOU](https://www.fpl.com/TOU)

Rates and storm charge update

Current FPL electric bills do not include a storm surcharge. This rate decrease took effect in August 2019. In addition, a small one-time refund is expected to be applied to a future bill, pending Florida Public Service Commission approval.

Protect your cost of doing business

Billions of dollars in electricity are stolen each year, making electricity the third most stolen product behind credit cards and automobiles. Stealing electricity is a felony. It can result in injury or death, and can lead to jail time and staggering financial consequences.

We work hard to serve all of our customers in the most cost-efficient manner possible. When someone steals electricity, it is both extremely dangerous and adds to our cost of doing business which drives up everyone's bills. Help stop thieves from driving up your energy bills.

If you see something – report it anonymously, call 800-528-6621.

Power line safety tips

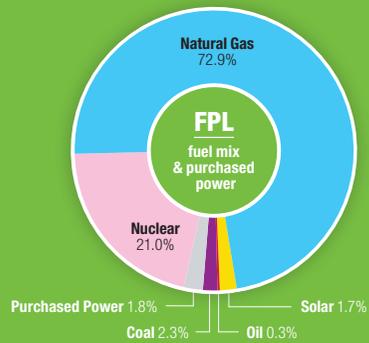

You can be seriously injured or worse if you or an object you are holding touches a power line. Stay more than 10 feet away from neighborhood power lines and at least 30 feet from larger higher-voltage lines. Hire a qualified professional to trim trees near power lines. Assume all lines are energized. Call 811 before you dig or visit Call811.com at least two business days before to avoid underground lines.

Where does your energy come from?

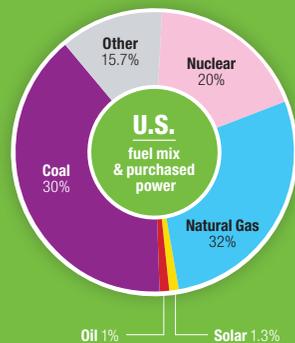

FPL's power comes from a variety of sources, including clean-burning natural gas and emissions-free nuclear and solar. We've substantially increased our investment in cost-effective solar while significantly reducing our use of coal.
